

IOSH Managing Safely

Overview

The flexible new high impact programme covers all the main health and safety issues, and includes a session tackling environment too.

Managing safely is for those required to manage safely and effectively in compliance with both their organisations policy and best practice in Health and Safety. It comprises of seven core modules requiring a total direct input of at least 24 hours plus assessment time. The delivery can be spread over a convenient time span. The programme is taught using a mixture of lectures, practical exercises to maintain interest and to allow delegates to practice the skills they have learned, so that they can be applied in the workplace.

Who Should Attend?

Managing safely is a course for managers and supervisors in any sector and any organisation. It's designed to give managers all they need to know to help them handle health and safety in their teams. This course give delegates in management and supervisor roles the knowledge and understanding of how to access and control risks whilst identifying hazards.

Delegates should have a basic understanding of workplace safety and should be capable of undertaking a written and practical assessment.
